About Me

Full-stack developer building clean, responsive web applications with React, Next.js, Tailwind CSS, Supabase, and Firebase. Experienced in frontend development, backend integration, authentication, database connectivity, and deployment.

Skills

Frontend	React.js, Next.js, JavaScript, TypeScript, HTML, Tailwind CSS
Backend	REST APIs, API Integration, Node.js, Web Scraping
Database	Supabase, PostgreSQL, Firebase
Focus	Full-Stack Development, Frontend Development, SaaS Applications

Experience

Full-Stack Developer 2023 – Present
Project-Based / Independent

- Built full-stack and frontend web applications from planning and interface design to development and deployment.
- Implemented authentication, database integration, storage workflows, and API connectivity using modern web technologies.
- Focused on clean UI, maintainable code, responsive layouts, and reliable delivery.

Projects

Boisetu – Used Book Marketplace Platform *Live*

Next.js, TypeScript, Tailwind CSS

- Built an online marketplace for buying and selling used books.
- Implemented a payment holding workflow that releases funds after successful delivery.

Ridge Park – Real Estate Company Website *Live*

Next.js, TypeScript, Tailwind CSS

- Built a corporate website for a real estate developer showcasing residential and commercial properties.
- Implemented project listings, company information, and inquiry features with a responsive interface.

StreamHQ – Streaming Platform *Live*

Next.js, TypeScript, Tailwind CSS

- Built a modern streaming platform interface with responsive layouts and clear content presentation.

SpendWiseGo – Smart Expense Tracker *Live*

React, TypeScript, Tailwind CSS, Firebase

- Developed an expense tracker for managing and monitoring personal spending.

AnitrailAPI – RESTful Anime Content API *Live*

Node.js, JavaScript, Web Scraping, REST API

- Created a RESTful API for anime content using scraping and structured data extraction.

DropSync – Peer-to-Peer File Sharing Platform *Live*

Next.js, TypeScript, Tailwind CSS, WebRTC

- Built a browser-based file sharing platform for direct peer-to-peer transfer.

Education

Daffodil International University Ongoing

B.Sc. in Computer Science and Engineering
